ABSTRACT: We previously discovered a hamster monoclonal antibody, TAB4, against mouse PSGL1/CD162 that can induce death of activated T cells. Here, we further investigated the potential of TAB4 in treating two murine models of T cell-mediated diseases. The results showed that administration of TAB4 suppressed incidence and severity of both GVHD and type I diabetes. Analyses of apoptotic T cells ex vivo shortly after antibody injection revealed a higher percentage of apoptosis among activated T cells in the TAB4-treated group than in the control group. Furthermore, restoration of functional donor T cells was observed in TAB4-treated mice. As TAB4 does not affect the binding of P-selectin to activated T cells, our data suggest that its long-lasting therapeutic effect on inhibiting disease progression is attained by specifically inducing apoptosis of activated T cells. These data hence extend our previous finding of the novel property of PSGL-1 and strongly indicate that the PSGL-1-specific apoptosis-inducing antibody is a new therapeutic agent possessing a great potential for controlling GVHD and other T cell-mediated autoimmune diseases.

ABSTRACT: Increasing evidence has shown that death signaling in T cells is regulated in a complicated way. Molecules other than death receptors can also trigger T-cell death. Here, we demonstrate for the first time that P-selectin glycoprotein ligand-1 (PSGL-1) or CD162 molecules crosslinked by an anti-PSGL-1 monoclonal antibody, TAB4, can trigger a death signal in activated T cells. In contrast to classic cell death, ***PSGL*** -1-mediated T-cell death is caspase independent. It involves translocation of apoptosis-inducing factor from mitochondria to nucleus and mitochondrial cytochrome c release. Ultrastructurally, both peripheral condensation of chromatin and apoptotic body were observed in ***PSGL*** -1-mediated T-cell death. Collectively, this study demonstrates a novel role for PSGL-1 in controlling activated T-cell death and, thus, advances our understanding of immune regulation. infiltration; in liver transplantation model is attenuated by
anti-PSGL-1 antibody

Reperfusion...

injury; anti-PSGL-1 antibody immunotherapy of ischemia-reperfusion
injury in liver transplantation model

Cell migration...

leukocyte infiltration; in liver transplantation model is attenuated by
anti-PSGL-1 antibody

Transplant and Transplantation...

liver; anti-PSGL-1 antibody immunotherapy of ischemia-reperfusion
injury in liver transplantation model

Human...

neutralizing antibody to rat P-selectin glycoprotein ligand 1

Apoptosis...

of hepatocytes in liver transplantation model is attenuated by
anti-PSGL-1 antibody

Immunotherapy...

of ischemia-reperfusion injury in liver transplantation by anti-PSGL-1
antibody

Drug targets...

P-selectin glycoprotein ligand 1

Cytokines...

proinflammatory; expression in liver transplantation model is
attenuated by anti-PSGL-1 antibody

Glycoproteins...

PSGL-1 (P-selectin glycoprotein ligand-1), gene Psgl1; anti-PSGL-1
antibody immunotherapy of ischemia-reperfusion injury in liver
transplantation model

Gene, animal...

Psgl1; anti-PSGL-1 antibody immunotherapy of ischemia-reperfusion

injury in liver transplantation model

Injury...

reperfusion; anti-PSGL-1 antibody immunotherapy of ischemia-reperfusion
injury in liver transplantation model

Liver...

transplant; anti-PSGL-1 antibody immunotherapy of ischemia-reperfusion
injury in liver transplantation model

CAS REGISTRY NUMBERS:

487794-08-1 amino acid sequence; anti-PSGL-1 antibody immunotherapy of
ischemia-reperfusion injury in liver transplantation model

422620-64-2 nucleotide sequence; anti-PSGL-1 antibody immunotherapy of
ischemia-reperfusion injury in liver transplantation model
